Summary:

Results-driven Web Developer with a strong foundation in programming, problem-solving, and data analysis. Skilled in web development technologies including HTML, CSS, JavaScript, and Python. Passionate about learning new technologies and seeking opportunities to transition into the field of data science by applying strong analytical and coding skills.

Education:

Bachelor's in Computer Science | University of ABC | 2021

- Relevant Coursework: Web Development, Introduction to Data Science, Algorithms, Databases, Statistics

Professional Experience:

Web Developer | XYZ Web Solutions | New York, NY | January 2022 – Present

- Developed and maintained web applications using JavaScript, React, and Python.
- Implemented front-end features and collaborated with back-end developers to create full-stack solutions.
- Optimized web applications for performance and responsiveness.
- Built and integrated APIs to support dynamic content and user interactions.
- Used SQL to query and manage client data, ensuring smooth data flow between front-end and back-end.

Junior Web Developer | ABC Technologies | Remote | June 2020 – December 2021

- Assisted in the development of e-commerce platforms and customer-facing websites.
- Wrote clean, scalable, and efficient code using JavaScript, HTML, CSS, and Python.
- Worked with data-driven solutions, including managing user databases and implementing reporting features.
- Participated in code reviews and collaborated with cross-functional teams to deliver high-quality products.
- Gained experience with data structures and algorithms while optimizing website functionality.

Projects:

Personal Portfolio Website

- Developed and deployed a personal portfolio website using HTML, CSS, JavaScript, and hosted on GitHub Pages.
- Showcased web development projects and embedded data-driven visualizations using JavaScript libraries like Chart.js.

E-commerce Product Recommendation System

- Created a basic recommendation system for an e-commerce site using Python and machine learning algorithms.
- Analyzed customer behavior data and implemented a collaborative filtering approach to suggest products to users.

Skills:

- Programming Languages: HTML, CSS, JavaScript, Python
- Web Development: React, Node.js, Express, Django, Flask
- Databases: MySQL, PostgreSQL, SQL
- Data Analysis: Basic Python (pandas, numpy), Data Visualization with JavaScript (Chart.js)
- Tools: Git, GitHub, Jupyter Notebooks
- Problem Solving: Strong debugging and troubleshooting skills, algorithm optimization

Languages:

English: Fluent

Spanish: Intermediate

Certifications:

- Full-Stack Web Development – freeCodeCamp, 2021
- Introduction to Data Science – Coursera, 2022
