

**Name:** John Doe  
**Email:** john.doe@email.com  
**Phone:** +1 (555) 123-4567  
**LinkedIn:** linkedin.com/in/john-doe

**Summary:**

Aspiring Data Scientist with foundational knowledge in data analysis and machine learning. Strong proficiency in Python and data visualization tools. Eager to apply analytical skills and passion for data to solve real-world problems and contribute to business growth. Currently seeking opportunities to gain hands-on experience and further develop technical skills.

**Education:**

Bachelor's in Computer Science | University of XYZ | 2023

- Relevant Coursework: Introduction to Data Science, Machine Learning Basics, Data Structures and Algorithms, Statistics for Data Science, Database Management

**Internship Experience:**

**Data Science Intern | DataTech Solutions | Remote | June 2023 – August 2023**

- Assisted in data collection, cleaning, and preprocessing for various data science projects.
- Conducted exploratory data analysis (EDA) on small datasets using Python (pandas, matplotlib).
- Built simple predictive models for classification tasks using scikit-learn (Logistic Regression, KNN).
- Created basic visualizations using matplotlib and seaborn to communicate findings to team members.
- Collaborated with the data science team on model evaluation and performance improvement.

**Projects:**

**Predicting Housing Prices using Regression**

- Built a linear regression model to predict housing prices based on features like square footage, number of rooms, etc.
- Evaluated model performance using RMSE and adjusted the model for better accuracy.

**Customer Segmentation with K-Means**

- Used unsupervised learning (K-Means) to segment customers based on purchasing behavior from a retail dataset.
- Analyzed the characteristics of each cluster to provide insights on target marketing strategies.

**Skills:**

- Programming: Python (pandas, numpy, scikit-learn), SQL
- Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Basic statistics
- Machine Learning: Basic classification and regression (Logistic Regression, KNN)
- Visualization: matplotlib, seaborn
- Tools: Jupyter, Git, Excel

- Databases: SQL, MySQL (basic querying and data manipulation)

**Languages:**

English: Fluent

Spanish: Basic

**Certifications:**

- Introduction to Data Science – Coursera, 2023
- Python for Data Science – DataCamp, 2022
